Serial Number: 09/961,265 Page 2

Art Unit: 1724

Initially, the following items should be noted:

- (1) The "clean copy" of claim 5 does not correspond to the "marked-up copy" of this claim. In the clean version, line 2 recites "a step <u>for</u> contacting", whereas in the marked-up version this claim recites "a step <u>of</u> contacting".
- (2) In line 6 of amended claim 5, a comma should be inserted between "poly(vinyl chloride)" and "polystyrene, since it appears that two separate substances are being recited.
- (3) Applicant's response filed December 11, 2002 merely argues that claim 5 has been amended to recite materials which are not taught by Ramsden et al. or Parry et al., but fails to explain why claim 8, which claim does not recite any specific material, also distinguishes over these references.

Correction is required.

This application contains claims directed to the following patentably distinct species of the claimed invention:

(1) adsorbent substance species (e.g. polyethylene, polystyrene, nylon 6, polysulfone, polyurethane, etc.).

Applicant is required under 35 U.S.C. 121 to elect a single disclosed adsorbent substance species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 8 is generic.

Serial Number: 09/961,265

Art Unit: 1724

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, Applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, Applicant must indicate which are readable upon the elected species. MPEP \$ 809.02(a).

Should Applicant traverse on the ground that the species are not patentably distinct, Applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the Examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to I. Cintins
